

Here I am with Professor Keiichi Noe, one of Japan's most famous philosophers and most recently a Vice President of Sendai University in Japan. We are standing in a park overlooking Sendai City during a Phenomenology conference back in the mid-1990's. He had helped to organize the Oriental side of the conference and I had helped to organize the Occidental side. I have tried to reach my old friend but to no avail. I hope he and his family are okay.

Addendum: Good news. My friend professor Noe wrote back to me. He and his family are fine.
